

TOTESTERS

The Totesters program gives Turner a clean, organized source-separation system on site while generating the highly detailed, independently verified diversion data Gilead's corporate sustainability requirements demand. Two program options are outlined below.

PRICING

OPTION A

Totesters Lease + Self-Haul

Totesters lease rate	\$20 / cart / month
Dumping at Premier facility	\$25 / cart
<i>Turner handles transport. Lease includes repair coverage for normal wear; gross negligence excluded.</i>	

OPTION B

Full-Service Exchange

Per exchange (18 Totesters)	\$850 / exchange
<i>Premier manages pickup, transport, processing, and reporting. Includes individual cart weighing and a complete stream-level diversion report.</i>	

WHY TOTESTERS

GRANULAR DIVERSION DATA

Each cart is weighed individually by material stream. The result is precise, defensible diversion data — not estimates.

SUPPORTS STRINGENT GOALS

Stream-level tracking and CORR Protocol verification means diversion reporting that holds up to Gilead's corporate sustainability scrutiny.

CLEANER, SAFER JOBSITE

Source separation at the point of generation keeps the site organized, reduces contamination, and increases efficiency.
